

Patient-Centered Mental Health in Pediatric Primary Care (PPP)

January 30 - February 1, 2026

A dynamic, virtual, three-day course followed by four months of case-based learning calls for pediatricians, family physicians, nurse practitioners, and physician assistants.

The PPP program trains clinicians to *assess, diagnose, and treat* mental health conditions they see in their everyday practice. This program will teach you to manage the most common issues yourself, saving referrals to mental health specialists for complex cases.

Includes 4 months of follow-up, case-based learning calls.
